

Keywords

Select at least 1 keyword, but not more than 3, from the list below.

absorption analysis	conjugates	glucose-sensitive	modeling	poly(vinyl alcohol)	stability
absorption enhancers	conjunctivitis	glycopolymers	modified starches	polyacetal	starch
acrylic derivatives	consumer products	graft copolymers	molecular weight	polyamides	stem cells
adhesion	contraceptive delivery	granulation	distribution	polyanhydrides	stratum corneum
adjuvant	controlled release	growth factors	monolayer	polycaprolactone	super critical fluids
aerosol	copolymers	gums	mucoadhesion	polycations	superabsorbent
aerosol delivery	corneal permeability	hair care	mucoadhesive tablets	polyelectrolytes	polymers
AIDS	crosslinked polymers	herbal drugs	and films	polyesters	supramolecular
alginates	crystallinity	HPMA copolymers	mucosal uptake	polyethylene glycols	assembly
anesthetics	cyanoacrylates	hyaluronic acid	mucos	polymer surfactant	surface analysis
angiogenesis	cyclodextrins	hydrocolloids	multi drug resistance	micropar	surface
antibiotics	cytokine	hydrogels	multi drug resistance-	polymeric micelles	characterization
antibodies	delayed release	hydrophilic matrices	associated protein	polymeric vesicles	surface erosion
anticancer agents	dendrimers	imaging	multiple emulsions	polymerization	surface modification
antidiabetics	dendritic cells	immunization	multiple-units dosage	polymers	surfactants
anti-emetics	detergents	immunoconjugate	forms	polysaccharides	sustained release
antifeedants	dextrans	immunogenicity	multivalency	polysiloxanes	swelling
antifungal agents	diffusion	immunotherapy	nanoparticles	polyurethanes	T cell vaccine
antigen	dissolution	implants	nanotechnology	polyvinylpyrrolidone	tablets
anti-inflammatory	DNA	in vitro release	nasal absorption	poorly soluble drugs	targeted delivery
agents	DNA delivery	in vitro-in vivo	nebulizer	pore size	taste masking
antimicrobials	DNA vaccine	correlation	NSAIDs	premature neonates	temperature-activated
antisense	doxylamine	inert matrices	nuclear magnetic	pressure sensitive	release
oligonucleotides	drug absorption	injectables	resonance	adhesive	termally reversible
antiviral agents	drug delivery	insecticides	nutraceuticals	prodrugs	gels
apoptosis	drug delivery systems	in-situ	ocular	protease inhibitors	thermal analysis
autoradiography	drug release	insulin	pharmacokinetics	protein adsorption	thermosensitive
barrier function	mechanism	intranasal delivery	oil gel	protein delivery	polymers
beverage	drug targeting	intranasal delivery	oligonucleotides	protein stability	thermosetting gels
bioadhesion	drug-eluting stent	ion-pairing	on-off switching	proteins	tissue engineering
bioavailability	electro-osmosis	iontophoresis	release	proteomics	topical drug delivery
biocides	electroporation	iontophoretic	ophthalmic delivery	pulmonary	toxicity
bioconjugation	embolization	enhancement	oral drug delivery	administration	transcutaneous
biodegradable	emulsions	ISCOMS	osmotic pumps	pulmonary delivery	delivery
polymers biomaterials	encapsulated enzyme	kinetics	osteotropic drug	pulsatile drug	transdermal drug
biorecognition	encapsulation	lectins	delivery	delivery	delivery
biosensors	endosomal release	lidocain	paracellular route	pulsed release	transepithelial
biotechnology	enhancement	hydrochloride	partitioning	pumps	transport
block copolymers	enteric coatings	lipid matrices	PEGylation	release	transfection
blood-brain barrier	enteric drug delivery	lipopolysaccharide	PEGylation	release kinetics	transit time
biocompatibility	enzymatic control	liposomal delivery	pellets	release mechanism	transmucosal
brain-targeted	enzyme delivery	liposomes	penetration enhancers	repellents	transmucosal drug
delivery	EPR	liquid crystals	peptide drug delivery	reproduction control	delivery
buccal drug delivery	erodible matrices	liquid formulation	peptide stability	restenosis	transporter
Caco 2 cells	ESR	local delivery	percutaneous	rheology	triggered release
capsule	ethylene-vinyl acetate	lyophilization	absorption	ruminants	tumor drug delivery
cationic lipids	excipients	macromolecules	periodontal diseases	scaffold	ultrasonic delivery
cell cultures	extrusion	macrophages	personal care	scintigraphy	vaccines
cell-based therapy	fertility regulation	magnetic resonance	pesticide	self-assembly	vaginal absorption
cellular	fiber	imaging	Peyer's patches	self-regulating	vesicles
pharmacokinetics	field-flow	manufacturing	p-glycoprotein	systems	veterinary
cellulose derivatives	fractionation	mathematical model	pharmacodynamics	short interfering RNA	wound dressing
ceramics	flavor	matrices	pharmacokinetics	silicone elastomers	zero order delivery
chitosans	flavor delivery	medical device	phase transition	single-unit dosage	zinc
cholesterol	flavor release	membranes	pH-control	forms	
chronotherapeutics	fluidized bed	metabolism	pH-controlled release	site-specific	
coacervation	fluorescence	methacrylates	pheromones	adsorption	
coating	foam	micelles	phospholipid	site-specific delivery	
cochleates	food	microcapsules	photodynamic	skin care	
colliodosomes	formulation	microclimate ph	therapy	skin irritation	
colloid	fragrances	microemulsions	photopolymerization	skin permeation	
colonic drug delivery	gastric residence time	microencapsulation	physicochemical	solid dispersion	
combination device	gastrointestinal transit	microparticles	plasticizers	solid lipid	
complement	gelatin	microporous	poloxamers	nanoparticles	
complexation	gels	membranes	poly (lactic acid) and	solvent interaction	
computer simulation	gene delivery	microscopy	poly (l-amino acids)	sonophoresis	
confocal microscopy	gene therapy	microspheres	poly (ortho esters)	spray-drying
