Dear Colleague:

As current and future presidents of the Controlled Release Society (CRS), it is our pleasure to invite you to participate in the 2010 CRS Annual Meeting & Exposition July 10-14. This international conference will take place in the environmental capital of the U.S.A. – Portland, Oregon.

The CRS Annual Meeting & Exposition attracts 1700 attendees from around the world who need your products, services, and technologies. The top pharmaceutical companies of the world are always in attendance. In Portland, you shall find scientists and decision makers involved in biomaterials, evaluation of CR products, gene therapy, nanotechnology, oral drug delivery, proteins and peptides, transdermals, tumor targeting, vaccines, veterinary/animal health, and more.

The meeting will deliver the newest and most exciting science in the delivery of bioactives and other functional materials from companies and universities that span the globe. From inside the Oregon Convention Center, you'll be able to meet and identify new prospects and leads, close deals, build relationships for future sales, and continue developing ongoing projects.

Reserve your exhibit booth now for the best exhibit booth rates. For additional information, please contact CRS Business Development Director Debby Woodard at dwoodard@scisoc.org or +1.651.994.3817.

To quote a CRS Annual Meeting & Exposition attendee, ***"No matter where CRS holds an annual meeting and exposition, we will surely be there."*** We couldn't have said it better ourselves. We look forward to welcoming you to Portland, Oregon, U.S.A.

Best regards,

Lisbeth Illum
CRS President 2008-2009

Diane Burgess
CRS President 2009-2010

CRS is the premier multidisciplinary society dedicated to promoting the science, technology, and innovation of delivery of bioactives for the benefit of the world population.
