Submission Deadline:

January 31, 2019

Research Spotlight:

Mahboobian MM et al. "Brinzolamide-loaded nanoemulsions: Ex vivo transcorneal permeation, cell viability and ocular irritation tests" *Pharm Dev Technol* 2018.

This study from FG member Ilva Rupenthal demonstrated that 7 brinzolamide nanoemulsions exhibited superior penetration across bovine cornea compared to the marketed brinzolamide suspension. Two of these showed no irritation, suggesting suitability for ocular use.
