

Venkata Vamsi Krishna Venuganti, PhD

Venkata Vamsi Krishna Venuganti is currently working as the Associate Professor, Department of Pharmacy and Associate Dean, Graduate Studies and Research at BITS Pilani, Hyderabad Campus. He has obtained a Ph.D. in Pharmaceutical Sciences from South Dakota State University, USA. Later, he joined BITS Pilani, Hyderabad Campus, in July 2010. He has four Indian patent applications filed and published more than 50 research articles and conference presentations. His research interests include the development of microneedles devices, nano-formulations for transdermal/topical applications, delivery of peptides, and nucleic acid-based drugs. He has received funding of about USD 0.75 million from government agencies and pharmaceutical industries. Under his guidance, four students received Ph.D., and ten students are currently pursuing their doctoral studies.
