

Dr. Paolo Decuzzi is a Senior Scientist and Professor of Bioengineering at the Italian Institute of Technology, where he founded the Laboratory of Nanotechnology for Precision Medicine in 2015. He also holds an Adjunct Professorship in the Division of Oncology at Stanford University and is co-founder of Chiromesh Therapeutics. He earned his M.Sc. in Mechanical Engineering from the Polytechnic University of Bari and his Ph.D. from the University of Naples Federico II.

A Fellow of the Controlled Release Society, Dr. Decuzzi has been actively engaged with the Society for over 15 years, serving in multiple roles. He was Chair of the CRS Italy Chapter, organized the CRS 2024 Annual Meeting in Bologna, and is actively involved in the CRS Translational Research initiative, promoting stronger connections between academia and industry.

Dr. Decuzzi has held academic appointments at leading institutions, including the University of Michigan, Princeton Materials Institute, Stanford University, the University of Texas, and the Houston Methodist, where he later served as Professor and Chair of Translational Imaging Department. He has authored over 200 publications, holds several patents, secured more than \$20 million in U.S. and EU funding, and mentored 10+ trainees who now hold faculty positions worldwide.
